Ingredients

- 4 Russet potatoes
- 2 tablespoons oil
- 2 teaspoons sea salt

Instructions

- The first step is to prepare the potatoes. Start by washing them thoroughly with cold water and a vegetable brush.
- Remove all dirt and debris, and dry the potato skins with a paper towel. Then, prick each potato several times with a fork. This will help steam escape as they cook in the air fryer and give you a crispy-skinned result.
- Next, brush each potato with oil and sprinkle it with salt. This will add flavor and help the potatoes get nice and crispy in the air fryer
- Place the potatoes into your air fryer basket, leaving enough room between them for even cooking. Set the fryer temperature to 400°F and cook time for 25 30 minutes. Remove when fork tender and golden brown.

Equipment

- Air Fryer
- Cooking Spray
- Parchment Paper, optional
